

The Badge Issuance Journey

eXpress badging's Proven Process

8 Steps of Discovery

This badge issuance journey ensures your project is completed quickly, correctly, and on time the first time.

Our Guarantee

If your photo ID badge does not look or work right, we will overnight a replacement for free!

WE PRINT FOR YOU

Use our Upload Center to securely upload your data or use our securely hosted Veonics Portal™ ID management website.

Provide existing photos with data. Use our Veonics Portal™ for live capture of new photos, or use our Veonics CELLfie™ capture tool.

Start with one of our ID design templates, or our team will replicate your design. We print after proof approval.

eXpress badging will work with your team ensuring each technology works in all systems: RFID, barcode, and mag-stripe.

We quickly, correctly, and on-time print, laminate, and encode all badge orders using high-quality PVC printers and laminators.

Badge orders can be shipped in a single engagement, in multiple batches, or individually to each recipient. You provide addresses.

We eliminate manual entry by duplicating existing ID numbers or providing an export list of new numbers for import enrollment.

Once received, and before handing out badges, spot-check within each batch, confirming they look great and work in all systems.

YOU PRINT YOURSELF

Create individual records in your Veonics Portal™ account, import batch lists, or integrate using our API and SFTP integration tools.

Upload existing photos in batches. Live-capture new photos in real-time or utilize our Veonics CELLfie™ remote capture tool.

Edit one of our sample templates in our ID template designer, or start from scratch; our support team will be there to assist.

eXpress badging will work with your team ensuring each technology works in all systems: RFID, barcode, and mag-stripe.

Our Veonics Portal™ software works in all Windows® printers, laminators, and encoders. We provide tech support and supplies.

Given your unique circumstances, our issuance team is there to offer tips and processes on the best way to issue badges to everyone.

Manually enroll each badge individually or batch import lists into each system. Or use our Veonics Portal™ integration tool.

Before handing out your badges, spot-check your print job confirming they look great and work in all systems.
